

NEW CONSTRUCTION NEWS from the SUPERINTENDENT!

The New Construction at Valley School is almost complete! The major work will be done by the first week in July, with close outs between then and the end of July. Our district has been fortunate to have excellent management of this project by the District's Business Manager, Angela Jones and PCM3, our Construction Management Company. Below is the plan for the first floor of the building, which includes the gymnasium, the library, changing rooms for students, bathrooms, and coaches' offices. Look on the back of this paper to see the second floor, with the two new science classrooms and a drawing of the outside of the building looking south from the playground.

First Floor

Gymnasium

Changing Rooms

Library

Future Classrooms with existing foundations in place and utility connections

Second Floor

Two Science Classrooms
