> Dear Sirs,

>
> In reviewing the notes from the last meeting, I was surprised to see
> that the first item in your list of considerations was still the gymnasium
> instead of classroom space. I recall that during the meeting I attended
> that we said that they should be listed in reverse since the classroom
> space and school master plan was more than just "building a gym". You
> noted

> that the previous group, the facilities committee, had made the same
> comment, and you did not have time to change it prior to the meeting, yet
> you did not implement the change before the next meeting.

> Several issues that I believe are important to consider:

> Student density levels current and future ? current campuses are
> overcrowded

> Just increasing the density of the student population will not be a good
> solution for the community

> Once a school property is sold it can never be bought back

> Current space on Valley is heavily utilized and not enough space exists to
> do everything

> Growth in student population is inevitable, it continues to grow each
> month

> Any change will impact someone, minimizing and balancing the impacts will
> be key

> We must have a master plan, not just a short term solution

> In order to develop funding sources, a plan that the whole community can
> buy into will be required

> Several options should be offered, it will take time for the community to
> develop consensus

>

> Thank You,

> Jim Hausle
