Subject: encourage you to move forward with considering existing buildings to address student overcrowding.

Dear Sirs and Madams,

Please do move forward with considering existing buildings to alleviate overcrowding. A few things to think about:

- population ebbs and flows, using existing buildings could save the city money and construction headache if/when our beach population ebbs
- I have worked at both the theatre in the community center and can attest to empty classrooms during the daytime, they could be used for classes
- we have many unused spaces that could be used for extended campus classes for the middle schoolers
- please consider using View for the middle schoolers 6-8 and Valley for K-5
- using what we have and thinking out of the box sets us apart
- let's not be the city that throws money at problems - it's obvious we have CITIZENS WHO CARE

Thank you,

Julie Nunis
