Yes, we have talked about it and it is a viable idea. Ed code prohibits the exchange of property between public entities but our lawyers are confident that there is a way to facilitate this if the board and council agrees.

Has there been any discussion about a land swap with the City? I am specifically thinking of the land at the park that is adjacent to Morningside and the Adult school building all the way to Gould. Take a portion of that for parking and give City some of the flat park area.

Would this require a ballot measure?
